

Manufacturer name:	Nestle Health Science															
About the Recall:	Nestle recently completed an investigation following complaints of sporadic leakage during use on five lots of their UltraPak 1500 ML Spike products. The integrity of the pouches is not compromised, and commercial sterility is maintained, but once spiked, the product may flow through an unsealed port fitment on the pouch. This issue does not pose a food safety risk but does not meet Nestle quality standards.
